Backend-focused software engineering student building REST APIs with ASP.NET Core, Spring Boot and NestJS. Available for a full-time internship from February 2027.

WORK EXPERIENCE

Goldframer (Macellan Venture Studio) — Software Engineering Intern **Jul 2026 – Aug 2026**

- Developed Daily Islamic Art, an Islamic art discovery mobile app, end-to-end using an AI-assisted workflow (Claude Code, ChatGPT), owning architecture, data modeling and handover.
- Built a NestJS REST API with Prisma and PostgreSQL, covering JWT access/refresh authentication, artworks, artists, likes and collections, with Redis caching for the daily feed.
- Built the React Native (Expo) client with a daily artwork feed, collections, wallpaper setting and an Android home-screen widget.
- Integrated Cloudflare R2 + CDN for images and a Next.js admin panel for curation; delivered a pnpm monorepo with Docker Compose and a deployment runbook.

Enuygun — IT Intern **Jun 2022 – Aug 2022**

- Observed software development workflows and team project management during a high school internship.

PROJECTS

Library Management API — ASP.NET Core Web API **Oct 2026**

- Built a layered ASP.NET Core Web API (API, Business, DataAccess, Entities) with Entity Framework Core (EF Core) and PostgreSQL, implementing JWT authentication with Admin/Member role-based authorization.
- Validated request DTOs with FluentValidation and mapped entities to DTOs with AutoMapper, wiring services through dependency injection (Scoped lifetime).
- Modeled book lending with a Loan entity, deriving book availability from active loans instead of a stored status and rejecting deletion of books with loan history.
- Configured a CORS policy and documented endpoints with Scalar and a Postman collection, developing features on Git feature branches.

Simple Note API — ASP.NET Core Web API **Oct 2026**

- Built CRUD endpoints with EF Core Code First and migrations, returning proper HTTP status codes (201/400/404), with dynamic title and category search and a Postman collection.

tnsup.app — Full-Stack Social Sports & Gaming Platform **Feb 2026**

- Built and deployed a full-stack social platform with an AI-assisted workflow, owning architecture, database design and production deployment; users post team-finding listings, apply to events and connect with nearby players.
- Developed RESTful APIs with Spring Boot for JWT authentication, listings, applications, friend requests and messaging, with WebSocket (STOMP) for real-time notifications.
- Designed a PostgreSQL schema for users, listings, applications, comments, chat messages and activity logs, with automated backups.
- Deployed with Docker Compose on an Ubuntu VPS behind Nginx and Cloudflare, with CI/CD via GitHub Actions, SSL, Fail2ban and rate limiting.

Summarize.ai — AI Text, URL and PDF Summarizer **Apr 2026**

- Built a FastAPI backend with Hugging Face integration (Qwen2.5-7B-Instruct) summarizing texts, URLs and PDFs in EN, TR, DE and FR.
- Implemented JWT authentication and summary history with SQLite and SQLAlchemy; built a React + Tailwind CSS frontend, containerized with Docker and deployed to Render and Vercel.

FasTravel — Full-Stack Travel Web Application (Team Project) **Dec 2024**

- Co-developed a travel tracking app with Java, Spring Boot, Angular and PostgreSQL, designing RESTful APIs for location management and collaborating via Git/GitHub.

EDUCATION

Burdur Mehmet Akif Ersoy University — B.Sc. Software Engineering **Sep 2023 – Jun 2027 (Expected)**

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Web Development.

Handan Hayrettin Yelkikanat Vocational and Technical Anatolian High School **Sep 2019 – Jun 2023**

TECHNICAL SKILLS

Languages: C#, Java, TypeScript, Python, JavaScript, SQL
Backend: ASP.NET Core Web API, Entity Framework Core (EF Core), FluentValidation, AutoMapper, JWT, Spring Boot, NestJS, FastAPI, WebSocket (STOMP)
Frontend & Mobile: React Native (Expo), Angular, React, Next.js, Tailwind CSS
Databases: PostgreSQL, Redis, SQLite
DevOps & Cloud: Docker, GitHub Actions (CI/CD), Nginx, Cloudflare R2, DigitalOcean, Render, Vercel
Tools: Git, GitHub, Postman, Scalar
AI-Assisted Development: Claude Code, ChatGPT
Spoken Languages: Turkish (Native), English (Intermediate – B1)
